2nd Annual

Advancing Marine CDR Summit

Developing Safe, Measurable Marine Solutions for Gigaton-Scale Carbon Removal

Establishing Robust Methodologies & Tools For MRV, Financing Safe Marine CDR Technologies & Scaling Carbon Credit Approaches To Drive Profitability & Yield

Expert Speakers Include:

Matan Rudis
Director of Business
Development
Gigablu

Wil Burns
Co-Executive
Director, Carbon
Removal Law &
Policy
American University

Nichole Price
Senior Scientist
**Bigelow Laboratory
for Ocean Sciences**

Jarred Guthrie
Chief Project Officer
Equatic

Marc von Keitz
Director
**The Grantham
Foundation for the
Protection of the
Environment**

Taylor Insley
Director of Strategic
Growth
Terraset

+1 617 455 4188 @ info@hansonwade.com

Welcome to the 2nd Advancing Marine CDR Summit

With global greenhouse gas emissions continuing to rise and sustainability practices coming under increased scrutiny in a changing political climate, there is an ever-increasing need for innovative carbon removal solutions.

Overall, carbon purchases are going strong with a 78% increase from 2023 to 2024. However, mCDR remains a small portion of this larger landscape, highlighting the need to focus on scaling this approach.

Back with a bang, the **2nd Advancing Marine CDR Summit** returns to Boston to unite a community of mCDR project developers, academic thought-leaders, buyers, investors, and more! This summit will provide actionable insights through **real-world case studies**, **solution-focused discussions**, and **interactive workshops** specifically designed to tackle the unique challenges in marine carbon dioxide removal.

Don't miss out on the opportunity to gain **cutting-edge knowledge on innovations in MRV**, learn the **best practices for pilot and commercial deployments**, discover **effective fundraising strategies**, and understand the **ecological impact of these practices**. These insights will empower you to drive your removals research and sustainability strategies forward with confidence.

This is your one-stop shop to hear how **Equatic** bridged the gap from R&D to commercial deployments, how **Bluegreen Water Technologies** have increased community buy-in to aid adoption of their technologies and why investors like **Propeller** and **Terraset** are choosing to invest in ocean-based climate technologies.

Aidan
Senior Program Director

Here's What Our 2024 Speakers Have to Say:

“The focus on legal, combined with new project proponents and practitioners in the field, including MRV companies, provides a well-rounded perspective”

**Founder & Chief Scientist,
Brilliant Planet**

“The main benefit I appreciated was meeting international colleagues in person, who I had only ever known by name or over zoom.”

**Assistant Professor,
Chief Science Officer,
Carboniferous**

KEY BENEFITS OF ATTENDING

Engage in Technical Discussions

Discover how experts like **Ken Buesseler** of the **Woods Hole Oceanographic Institution** are innovating MRV technologies to accurately measure the sequestration of carbon with an emphasis on ecological impact.

Gain Deployment Insights

Explore the operational and logistical **Gigablue** and **Equatic** during their most recent deployments and learn the steps they took to overcome these obstacles.

Navigate the Changing Permitting & Policy Landscape

Whether you operate domestically or in international waters, gain invaluable insights from policy experts at the **Institute of Carbon Removal**. Understand the current regulatory landscape and how it's evolving with the new US administration.

Collaborate with Co-Industries & Local Communities

Accelerate the scale-up of mCDR technologies by developing buy-in from local communities and collaborating with co-located industries and infrastructure. Hear from **Bluegreen Water Technologies** and **PRONOE** on their successful strategies.

Investigate Current Fundraising & Investment Routes

Understand the varying needs & wants of buyers, investors and philanthropic organisations with presentations from **Propeller**, **Terraset** and the **Grantham Foundation for the Protection of the Environment** to ensure you are demonstrating the value of your mCDR approach.

Your Expert Speakers

Wil Burns
Co-Executive Director,
Carbon Removal Law &
Policy
American University

Laura Stieghorst
Founder
BASICO

Nichole Price
Senior Scientist
**Bigelow Laboratory for
Ocean Sciences**

Eyal Harel
Co-Founder & Chief
Executive Officer
**Bluegreen Water

Alex Milde
Founder
Scaled Carbon

Taylor Insley
Director, Strategic Growth
Terraset

Ken Buesseler
Senior Scientist
**Woods Hole
Oceanographic
Institution**

Katie Lebling
Climate Program
Associate
**World Resources
Institute**

“The small but very involved group really worked for the event. There was a chance to get to know everyone, and they were all people that were good to know.”

2024 Attendee, Founder, **Oceanid MRV**

Pre-Conference Workshop Day Tuesday, July 8

Registration & Morning Coffee

9.00

Workshop A

10.00 - 12.30

Applying the Fundamentals to Understand Where mCDR Fits into Your Sustainability Strategy

This workshop is designed for those new to mCDR or seeking a comprehensive overview of the current state-of-play. Participants will explore different mCDR approaches, understand their applications, and learn about the field's evolution and key milestones. The workshop will also highlight the comparative benefits of mCDR versus to other Carbon Dioxide Removal methods.

This workshop will cover:

- Technical differences and applications of various mCDR approaches
- Evolution and key milestones in the mCDR field
- Comparative benefits of mCDR and other Carbon Dioxide Removal Methods

Workshop Leaders

Jarred Guthrie
Chief Project
Officer
Equatic

Benjamin Slotnick
Founder & Chief
Executive Officer
**Lillianah
Technologies**

Lunch Break

12.30

Workshop B

1.30 - 4.00

Developing mCDR Technologies in Increasingly Turbulent Political Waters

This workshop will address the critical aspects of developing mCDR technologies amidst political and regulatory uncertainties. Participants will explore the impact of governmental changes on the mCDR space and the importance of adapting to shifting government opinions on climate technologies.

This workshop will cover:

- Adapting to shifting government opinions on climate technologies
- Potential for public-private partnerships to advance mCDR projects
- Addressing disinformation and effectively communicating the importance of CDR

Workshop Leaders

Wil Burns
Co-Executive
Director, Carbon
Removal Law &
Policy
**Institute for
Carbon Removal
Law & Policy**

Eyal Harel
Co-Founder &
Chief Executive
Officer
**Bluegreen Water
Technologies**

End of Pre-Conference Workshop Day

4.00

▮▮ The governance framework for mCDR is kinetic and evolving. The mCDR community must play an active role in helping to shape this environment given both its interests and expertise. ▮▮

Wil Burns, Co-Executive Director, Carbon Removal Law & Policy, Institute for Carbon Removal Law & Policy

Conference Day One

Wednesday, July 9

7.30 Check-In, Coffee & Light Breakfast

8.25 Chair's Opening Remarks

Exploring Industry Advancements & Novel Technologies to Understand the Current State of mCDR

8.30 Fireside Chat: Exploring Where the mCDR Field is 1 Year on to Address Remaining Knowledge Gaps & Share Lessons Learned

- Discussing recent advancements and milestones in the field
- Developing a community strategy for the mCDR field as a whole to ensure shared progress and vision
- What are the key questions the field still hasn't answered?

Matan Rudis
Director of Business Development
Gigablue

Jarred Guthrie
Chief Project Officer
Equatic

Nichole Price
Senior Research Scientist
**Bigelow Laboratory for
Ocean Sciences**

Matan Rudis
Director of Business
Development
Gigablue

9.00 Showcasing Successful Deployments & Identifying Best Practices for Future Success

- Showcasing OAE projects, including the journey from initial dosing to crediting
- Emphasizing the importance of community engagement, scientific collaboration, and regulatory compliance
- Discussing the scalability of their solutions, continuous monitoring and verification, and the positive environmental impacts of their projects

Alex Milde
Founder
Scaled Carbon

9.30 Innovating Monitoring Techniques for Ocean Alkalinity Enhancement to Enable a Scalable & Affordable mCDR Approach

- Presenting the concept of Coastal Enhanced Weathering (CEW) and its potential for scalable and cost-effective mCDR
- Summarizing the early-stage development of a sediment tracing methodology for measuring the effects of CEW
- Discussing the development of a fit for purpose sediment tracer, including preliminary lab experiments and future plans for field trials

10.00 Morning Refreshments & Speed Networking

Optimizing MRV Techniques to Improve Measurement & Streamline Certification

Nichole Price
Senior Research
Scientist
**Bigelow Laboratory
for Ocean Sciences**

11.00 Optimizing Measurement in Seaweed Farming: Techniques for Improved Carbon Burial Assessment

- Quantifying carbon burial in global seaweed farms to enhance understanding of seaweed farming's role in carbon sequestration
- Analyzing sediment layers and organic carbon stocks over time to provide insights into long-term carbon storage potential
- Comparing carbon burial rates in seaweed farms to reference sediments to identify best practices for maximizing carbon burial efficiency

Ken Buesseler
Senior Scientist
**Woods Hole
Oceanographic
Institution**

11.30 The Importance of MRV for Ecological & Environmental Impacts

- Considerations for MRV for C and eMRV for the ecological and environmental impacts of mCDR
- Lessons from ocean iron fertilization
- Developing methodologies for comprehensive eMRV
- The ecological impact of mCDR technologies and avoiding harm: Considerations for pilot studies vs. at scale

Conference Day One

Wednesday, July 9

Adam Schlenger
Senior Ecologist,
Ecosystem Service
Modeling
**US Environmental
Protection Agency**

12.00 Integrating MRV Data into Cutting Edge Models to Improve Predictive Capabilities

- Integrating MRV data with advanced modeling techniques
- Leveraging models to support decision-making and project planning
- Addressing the need for thorough modeling in MRV, considering multiple models

12.30 Lunch

Navigating Permitting Challenges to Streamline the Regulatory Process

Wil Burns
Co-Executive Director,
Carbon Removal Law &
Policy
**Institute for Carbon
Removal Law & Policy**

1.30 Navigating Global Ocean CDR Policy & Governance for Industry Success

- Addressing emerging international regulatory challenges that may bottleneck ocean CDR progress
- Exploring international permitting frameworks and challenges to navigate global regulatory landscapes
- Understanding international agreements like the London Convention and the BBNJ agreement and impact these new regulations may pose to international CDR operations

2.00 Expert Discussion: Overcoming Challenges in the Permitting Process to Ensure Compliance & Efficiency

- Navigating the permitting process for mCDR projects, including national and international regulations, to ensure compliance
- Learning from recent permitting successes and challenges to identify best practices
- Identifying strategies to streamline the permitting process, leading to more efficient project approvals

Katie Lebling
Senior Associate, Climate Program
World Resources Institute

Wil Burns
Co-Executive Director, Carbon Removal Law & Policy
Institute for Carbon Removal Law & Policy

2.30 Afternoon Refreshments

Collaborating with Co-Industries & Community Stakeholders to Drive Sustainable Growth & Local Support

Stefano Cappello
Founder & Chief
Executive Officer
Limenet

3.00 Harnessing Coastal Industry Synergies for Advanced Marine Carbon Dioxide Removal

- Showcasing environmental benefits of Limenet's CO₂ removal integrated with water management
- Collaborating with coastal industries to enhance carbon removal and sustainable lime production
- Ensuring precise measurement of carbon sequestration and environmental impact

Raffael Jovine
Founder & Chief
Scientist
Brilliant Planet

3.30 Creating Coastal Industry Partnerships for Enhanced Marine CDR

- Demonstrating the environmental benefits of integrating CO₂ removal with water management systems
- Partnering with coastal industries to optimize carbon removal technologies and sustainable lime production
- Ensuring effective measurement of carbon sequestration and environmental impact to build trust with partners

Nicolas Sdez
Co-Founder & Chief
Executive Officer
PRONOE

4.00 Utilizing Co-Located Industries for Marine CDR Scale-Up Insights & Strategies

- Quantifying environmental co-benefits to demonstrate the value of environmental monitoring and industrial synergies
- Collaborating with coastal industries by engaging with water, energy, and waste sectors to enhance project outcomes
- Innovating through partnerships to fostering innovation by developing strategic partnerships with co-located industries

4.30 Chair's Closing Remarks

Conference Day Two

Thursday, July 10

8.25 Check-In, Coffee & Light Breakfast

8.55 Chair's Opening Remarks

Leveraging Insights from Recent Deployments to Improve Future mCDR Projects

Ben Slotnick
Founder & Chief
Executive Officer
Lillianah Technologies

9.00 Cutting Deployment Costs with Adaptation & Collaboration for Enhanced Efficiency & Effectiveness

- Adapting existing agreements and infrastructures to minimize costs, enhancing project efficiency
- Identifying optimal deployment locations based on CDR approach to maximize effectiveness
- Partnering with existing sustainable ocean industries to share knowledge and resources, fostering collaboration

Laura Stieghorst
Founder
BASICO

9.30 Leveraging Insights from Pilot Projects to Optimize Future Deployments & Enhance Success

- Analyzing lessons learned from pilot projects to inform future deployments
- Applying insights to optimize deployment strategies based on real-world data
- Identifying key factors for successful pilot project deployment to enhance scalability

10.00 Morning Refreshments & Poster Session

Applying Lessons from Large Scale mCDR Projects to Avoid Potholes & Develop Strategies for Scale-Up

Jarred Guthrie
Chief Project Officer
Equatic

11.00 Scaling Success & Developing Strategies to Scale mCDR Projects for Maximum Impact & Viability

- Exploring scalable technologies and deployment locations to maximize impact
- Identifying key factors for successful scale-up to ensure project viability
- Developing strategies for large-scale deployment to achieve significant carbon removal

Ben Slotnick
Founder & Chief
Executive Officer
Lillianah Technologies

11.30 Roundtable Discussion: Overcoming Challenges in Scaling Up mCDR Projects

- Discussing the scalability of different mCDR approaches and their potential impact
- Addressing the challenges of scalability, including technical and regulatory risks
- Exploring strategies to achieve large-scale impact, including high seas and open ocean deployments

12.00 Lunch

Conference Day Two

Thursday, July 10

Unlocking Funding, Carbon Credits & Verification to Build a Scalable & Sustainable Carbon Market

Moshe Harel
Founder & Chief
Scientific Officer
**Bluegreen Water
Technologies**

1.00 Navigating the Path to Market & Achieving Success on the Journey to Carbon Credits

- Understanding the steps companies need to take for trials in international waters to ensure compliance
- Exploring the role of international collaboration and governance in mCDR projects
- Identifying strategies to navigate the complexities of international governance, enhancing project success

Steven Fox
Partner
Propeller

1.30 Investing in Ocean Climate-Tech to Drive Innovation & Industry Growth

- Highlighting Propeller VC's dedication to early-stage climate-tech investments related to the ocean
- Featuring primary investment themes and notable startups in Propeller VC's portfolio
- Providing insights into emerging trends and opportunities in the ocean-climate tech sector

2.00 Afternoon Refreshments

Riding the Waves to a Successful Future of mCDR Funding & Growth

Taylor Insley
Director, Strategic
Growth
Terrasat

2.30 Expanding the Pool of Stakeholders through Funding & Philanthropy for Greater Impact

- Exploring the role of philanthropic organizations in funding mCDR projects
- Identifying new investors and collaborators to expand the pool of stakeholders
- Developing strategies to attract funding and collaborations, ensuring long-term project viability

3.00 Panel Discussion: Overcoming Market Challenges & Future Perspectives on mCDR & the VCM

- Discussing the major unanswered questions and unknowns in mCDR, specifically with MRV, with a focus on mutual information-sharing
- Examining the future research priorities and directions for mCDR over the next one to five years, incorporating insights from participants

Adam Schlenger
Senior Ecologist, Ecosystem Service Modeling
US Environmental Protection Agency

Taylor Insley
Director, Strategic Growth
Terrasat

Marc von Keitz
Director
**The Grantham Foundation
for the Protection of the
Environment**

3.30 Chair's Closing Remarks & End of Conference

Partner With Us

Your Exclusive Opportunity to Build Meaningful Connections with a Focused Community of mCDR Decision Makers & Collaborators

Our audience of CDR experts and C-suite leaders are working hard on their innovative solutions to the climate crisis, but they are aware that they cannot do this alone. As they seek to commercialize their solutions, they are turning to **external MRV** and **modeling services** to accurately measure carbon sequestration and **Carbon Removal Verifiers** and **Registries** to maintain project integrity and drive buyer confidence.

Join us to position your brand and products as indispensable solutions in the race to address the climate crisis with cutting-edge ocean-based technologies.

Benefits of Partnering with the 2nd Advancing Marine CDR Summit:

Create Trust & Credibility in Your Brand

Showcase your product or service's unique features and benefits on stage, demonstrating how you can assist potential clients in enhancing their CDR strategies.

Stand Out from the Competition

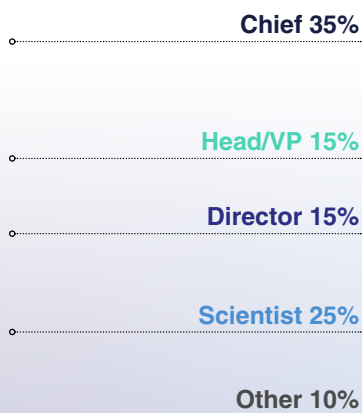

Exhibit on our floor to showcase your products to top innovators in sustainable project development. Engage with leaders actively seeking partners to optimize their carbon capture processes.

Generate Commercial Opportunities

Host networking events, happy hours, or exclusive dinner invitations to connect with key decision-makers and industry leaders. Foster meaningful relationships that can drive business growth and unlock new opportunities.

Collaborate with fellow experts to uncover your current bottlenecks and enable the growth of your mCDR approach

Discover how your peers in the mCDR field are harnessing the latest technologies and science to sequester impactful amounts of carbon

Reignite your passion for marine carbon removal with a like-minded community of solution-led thought-leaders, innovators and advisors

Project Developer & Credit Buyer Pricing*	Register by Friday, April 4	On the Door Price
Conference + Workshop Day	\$2,497 (Save \$700)	\$3,197
Conference Only	\$1,699 (Save \$700)	\$2,399

Academic, Start Ups, Government Agencies & NGOs Pricing**	Register by Friday, April 4	On the Door Price
Conference + Workshop Day	\$1,997 (Save \$700)	\$2,697
Conference Only	\$1,299 (Save \$700)	\$1,999

Service & Solution Provider Pricing	Register by Friday, April 4	On the Door Price
Conference + Workshop Day	\$3,697 (Save \$700)	\$4,397
Conference Only	\$2,499 (Save \$700)	\$3,199

*To be eligible for Project Developer pricing, the individual or group must have an active CDR project and not offer paid for services. Please visit the website for full pricing options or email info@hansonwade.com

**To be eligible for Government, NGO & Academic Pricing, the group or individual must be full-time academic(s) or working full time for a government / NGO organization. Please visit the website for full pricing options or email info@hansonwade.com

Team Discounts**

- 10% discount – 2 Attendees
- 15% discount – 3 Attendees
- 20% discount – 4 + Attendees

***Please note that discounts are only valid when two or more delegates from one company book and pay at the same time.

Discounts cannot be used in conjunction with any other offer or discount. Only one discount offer may be applied to the current pricing rate.
