

Bryan Northrop Executive VP & General Manager

Skanska USA Building

Q1: Can you give us a bit of a background on yourself please?

Answer: I have been involved in the commercial construction industry in New **England for 27 years and I am Executive** Vice President and General Manager for Skanska's building construction operations in New England. I also serve as Skanska's Executive Sponsor for our national Science and Technology **Advisory Council. I have spent much of** my career planning and constructing life science facilities including biomanufacturing facilities, research and development facilities, and STEM education facilities for the Pharmaceutical, Healthcare, and Higher **Education communities.**

Q2: Why does the life science construction community need this event?

Answer: The event provides all members of the life science community the opportunity to learn from each other, share best practices and lessons learned, and to make connections that will allow us to continue to advance the design and

construction of the quickly advancing facilities that are needed to allow the research, development, and production of new drugs and treatments.

INTERVIEW

Q4: What are you most excited about for this year's event?

Answer: I am excited to learn about recent projects and innovative design and construction techniques used to improve the delivery of these projects and the quality of the facilities. It is also a great opportunity to expand your network, learn from others, and to develop relationships that will help advance the industry.
