

Course Name	Created by	Conference Date	Short description	Course Website	Length in hours	CE Course Number
Creating a Roadmap for Program Development to Go From Vision to Action	Advancing Construction	7/15/2024	Targeting teams just getting their programs started, this session will help sustainability leaders create a business plan to establish their sustainability strategy and department	https://advancing-construction-decarbonization.com/w-hats-on/pre-conference-workshop-day/	2	920030396
Creating a Carbon Inventory & Reporting System to Enable Program Measurement	Advancing Construction	7/15/2024	Targeting teams just getting their programs started, this session will help identify the data points and build a system to collect said data for carbon reporting	https://advancing-construction-decarbonization.com/w-hats-on/pre-conference-workshop-day/	2	920030397
Becoming an Effective Leader to Build Momentum With Early-Stage Sustainability Initiatives	Advancing Construction	7/15/2024	Targeting teams just getting their programs started, this session will build the soft skills needed to successfully enact change and be a more effective leader.	https://advancing-construction-decarbonization.com/w-hats-on/pre-conference-workshop-day/	2	920030398
Ensuring Consistency: How Can You Engage All Offices & Disciplines Across the US in Your Sustainability Program?	Advancing Construction	7/15/2024	Targeting teams who already have an established sustainability program, this session will focus on how leaders can engender consistency of application of their programs across multiple offices.	https://advancing-construction-decarbonization.com/w-hats-on/pre-conference-workshop-day/	2	920030399
Guiding Efficient Organizational Change to Maintain Company-Wide Commitment to More Sustainable Practices	Advancing Construction	7/15/2024	Targeting teams who already have an established sustainability program, this session will focus on helping established programs increase commitment to sustainability with project teams.	https://advancing-construction-decarbonization.com/w-hats-on/pre-conference-workshop-day/	2	920030400
Education Knowledge Sharing Process to Continue Scaling Your Sustainable Practices	Advancing Construction	7/15/2024	Targeting teams who already have an established sustainability program, this session will explore knowledge sharing best practice to ensure that programs are rooted in lessons learned rather than theory.	https://advancing-construction-decarbonization.com/w-hats-on/pre-conference-workshop-day/	2	920030401

Maximizing Project Sustainability: From Cradle to Grave, How Did We Maintain Commitment to Sustainable Decisions at Every Stage?	Advancing Construction	7/16/2024	This session will explore how different organizations have been able to maintain project team focus on sustainability as a top priority.	https://advancing-construction-decarbonization.com/w/hats-on/day-one/	0.5	920030402
Driving Cultural Change: Ensuring Commitment to Implementing Sustainability in the Field	Advancing Construction	7/16/2024	This session will explore how sustainability leaders can work with their field teams to educate them on the importance of jobsite emission reduction and ensure this stays front of mind.	https://advancing-construction-decarbonization.com/w/hats-on/day-one/	0.5	920030403
Building the Business Case for Clients to Prioritize Sustainability & Overcome Cost Premium Pushback	Advancing Construction	7/16/2024	This sessions will dive into lessons learned from receiving pushback for investment from clients when seeking investment for embodied carbon reduction strategies, and discuss approaches to overcome this.	https://advancing-construction-decarbonization.com/w/hats-on/day-one/	0.5	920030404
Establishing Project Carbon Performance Management Frameworks to Align Responsibilities & Accountability Across all Project Partners	Advancing Construction	7/16/2024	This sessions will share a framework for aligning all stakeholders on a single strategy for tracking and reducing jobsite carbon, so that participants can apply this framework to their own projects post event.	https://advancing-construction-decarbonization.com/w/hats-on/day-one/	0.5	920030405
Devising an Approach to Better Align Corporate Commitments with Client & Supplier Values	Advancing Construction	7/16/2024	This sessions will share an approach to defining corporate sustainability commitments with the priorities of shareholders and customers (both internal and external) alike.	https://advancing-construction-decarbonization.com/w/hats-on/day-one/	0.5	920030406
Harnessing the Power of Mass Timber as a Material to Support Carbon Sequestration Goals	Advancing Construction	7/16/2024	This session will educate participants on the benefits of mass timber adoption in supporting sustainability goals. Participants will walk away with a base level understanding of when and why timber may be an option.	https://advancing-construction-decarbonization.com/w/hats-on/day-one/	0.5	920030407

Encouraging Early Designer-Contractor Collaboration to Find Lower-Cost, Sustainable Alternatives	Advancing Construction	7/16/2024	This panel discussion targets the improvement of designer/contractor relations as it relates to sustainable decision making in design. Participants will explore how they can make more impactful decisions together.	https://advancing-construction-decarbonization.com/w/hats-on/day-one/	0.5	920030408
Improve the Quality of Data Collected in the Field to Improve Accuracy of Carbon Tracking	Advancing Construction	7/16/2024	This panel discussion will share experiences of contractors improving the quality of data collected in the field and support attendees to come up with their own action plan to more accurately track scope one, two and three emissions on projects.	https://advancing-construction-decarbonization.com/w/hats-on/day-one/	0.5	920030409
Operationalizing Corporate Commitments into Clearly Actionable Goals to Lower Emissions	Advancing Construction	7/16/2024	This panel discussion will bring together advanced practitioners to discuss how they are operationalizing ESG commitments through the organization, ensuring consistency and commitment of implementation.	https://advancing-construction-decarbonization.com/w/hats-on/day-one/	0.5	920030410
Educating Trades on the Importance of Decarbonization to Ensure Alignment with Project Goals	Advancing Construction	7/16/2024	This session will share strategies to enhance buy in to sustainability programs from trade contractors, and support participants to devise action plans to encourage greater adoption of low-carbon construction strategies onsite.	https://advancing-construction-decarbonization.com/w/hats-on/day-one/	0.5	920030411
Building Out Education Programs for Your Organization to Create Alignment with Corporate Commitments	Advancing Construction	7/16/2024	This session will share practical strategies for how corporate leaders can better align internal stakeholders with ESG commitments through learning and performance management programs.	https://advancing-construction-decarbonization.com/w/hats-on/day-one/	0.5	920030412

Integrating Carbon Data into the Model From Schematic Design to Inform Early Design Decision-Making	Advancing Construction	7/16/2024	This panel discussion will walk through the challenges of integrating carbon data into early stage modeling to help inform the decisions of the project team in reducing both embodied and operational carbon.	https://advancing-construction-decarbonization.com/w/hats-on/day-one/	0.5	920030413
Integrating Sustainability into the Bidding Process to Ensure Selection of Project Partners to Deliver Your Project Requirements	Advancing Construction	7/16/2024	This panel discussion will focus on the procurement phase of the project, encouraging participants to devise a revised series of questions and parameters to ensure partner sustainability.	https://advancing-construction-decarbonization.com/w/hats-on/day-one/	0.5	920030414
Upskilling Your People to Strengthen Conscious Action & Decision-Making	Advancing Construction	7/16/2024	This session will look at how sustainability leaders can coach and develop operations leaders to drive better decisions and thus project outcomes.	https://advancing-construction-decarbonization.com/w/hats-on/day-one/	0.5	920030415
From Policy to Practice: How is Europe Embracing ESG Regulations?	Advancing Construction	7/16/2024	This session will provide an overview of the current state of play with construction sustainability in Europe, and discuss how US companies can employ enhanced strategies to improve their own programs and align with international frameworks.	https://advancing-construction-decarbonization.com/w/hats-on/day-one/	0.5	920030416
Navigating Today's Policy & Regulatory Maze: The Current State of Construction-Related Policy & How to Prepare for the Future	Advancing Construction	7/16/2024	This course will provide an update on evolving US regulation, so that participants can understand the coming pressures to their programs, and create action plans to adapt accordingly.	https://advancing-construction-decarbonization.com/w/hats-on/day-one/	0.5	920030417

Enhancing Senior Management Buy-In to Ensure Sustainability Remains a Core Pillar of Corporate Strategy Long into the Future	Advancing Construction	7/17/2024	This session will share various metrics and other evidence that can enhance your business case for further investment into carbon reduction strategies and frameworks from the business. This will involve how to integrate such newly introduced policies into the fabric of the business to increase adoption.	https://advancing-construction-decarbonization.com/w/hats-on/day-two/	0.5	920030418
Client-Driven Sustainability: What are Our Primary Goals & Roadblocks in Our Own Sustainability Journey?	Advancing Construction	7/17/2024	This session will share the perspectives of 4 leading clients on their own sustainability goals and the demands they are placing on their partners with regards to carbon reduction initiatives. This will help all designers and contractors to better understand and align to the needs of their customers.	https://advancing-construction-decarbonization.com/w/hats-on/day-two/	0.5	920030419
Demystifying the EPD Preparation Process for Suppliers & Contractors	Advancing Construction	7/17/2024	This session will dive into how to prepare an EPD and so participants are required to come with prior understanding as to their use and the challenges associated with them.	https://advancing-construction-decarbonization.com/w/hats-on/day-two/	0.5	920030420
Harnessing Equipment Electrification to Help Us Achieve Site Carbon Neutrality	Advancing Construction	7/17/2024	This session will help participants assess how fleet electrification may enhance their sustainability programs, the hurdles with similar programs, and help them to create a pilot program for implementation within their organization.	https://advancing-construction-decarbonization.com/w/hats-on/day-two/	0.5	920030421
Building a Technology Stack for End-to-End Inventory Tracking	Advancing Construction	7/17/2024	This session will focus on introducing a new software for carbon inventory tracking to enhance established corporate programs. Participants will look at options available to them, and decision making factors to help them create a plan to incorporate new technologies for their own organizations.	https://advancing-construction-decarbonization.com/w/hats-on/day-two/	0.5	920030422

Exploring Cutting-Edge Materials to Optimize Project Efficiency	Advancing Construction	7/17/2024	This panel discussion will focus on the materials driving further innovation in carbon reduction, how contractors can employ these materials, and to what cost.	https://advancing-construction-decarbonization.com/w-hats-on/day-two/	0.5	920030423
Expanding Beyond Electrification to Reduce Fuel Emissions Despite Equipment Shortages	Advancing Construction	7/17/2024	This panel discussion focuses specifically on fleet electrification, empowering participants to be able to devise an action plan for their organization.	https://advancing-construction-decarbonization.com/w-hats-on/day-two/	0.5	920030424
Benchmarking Software Options to Support Effective Carbon Inventorying	Advancing Construction	7/17/2024	As an introductory session to the software options on the market and how to employ them, this session is open to all.	https://advancing-construction-decarbonization.com/w-hats-on/day-two/	0.5	920030425
Harnessing Life Cycle Analysis (LCA) to Help Understand Your Carbon Emissions	Advancing Construction	7/17/2024	This session will walk participants through how to conduct a robust lifecycle analysis and integrate these findings into the overall project strategy for carbon emission reduction.	https://advancing-construction-decarbonization.com/w-hats-on/day-two/	0.5	920030426
Building Out a Robust System for Jobsite Waste Accounting to Reduce Environmental Impact	Advancing Construction	7/17/2024	This session will address the 'how to' behind creating an onsite waste reduction strategy that can be rolled out across multiple projects and adapted regionally depending on prevalent regulation.	https://advancing-construction-decarbonization.com/w-hats-on/day-two/	0.5	920030427
Aligning Suppliers With Corporate Commitments To Align Materials Innovation With Industry Priorities	Advancing Construction	7/17/2024	This session will help participants to enhance their supply chain quality-ensuring that ESG becomes a key criteria for success in the procurement of products and services for your business.	https://advancing-construction-decarbonization.com/w-hats-on/day-two/	0.5	920030428
Exploring How Alternative Project Delivery Models Can Be Used to Support More Sustainable Choices at Every Stage of the Project Lifecycle	Advancing Construction	7/17/2024	This session will overview the different types of project delivery and how they can benefit your project. Join this session if you are looking to change the minds of even the most traditional thinkers, and embrace new ways of working.	https://advancing-construction-decarbonization.com/w-hats-on/day-two/	0.5	920030429

Implementing Easy Wins for Waste Reduction: How are We Implementing Better Recycling Models for Plastics & Trash on Job Sites?	Advancing Construction	7/17/2024	This session will discuss lessons learned from a variety of companies looking to reduce waste onsite, to feed those lessons learned into participant action plans.	https://advancing-construction-decarbonization.com/w-hats-on/day-two/	0.5	920030430
Building Strategic Partnerships With Materials Vendors to Drive More Cost-Efficient Solutions	Advancing Construction	7/17/2024	This panel discussion will share lessons learned with building more strategic vendor relations in order to drive quality, yet const effectiveness in more sustainable alternatives.	https://advancing-construction-decarbonization.com/w-hats-on/day-two/	0.5	920030431
Charting the Path to Net Zero: Where is the Industry to Date & What is the Realistic Future Roadmap?	Advancing Construction	7/17/2024	This session will be an overview of the upcoming legislation and client trends that may impact sustainability goals in the coming years, with a view to providing participants with an understanding of the actions they need to take to align their own ESG programs and goals.	https://advancing-construction-decarbonization.com/w-hats-on/day-two/	0.5	920030432
